

SCHOLARSHIP

IN REVIEW

A REPORT FROM THE LEWIS KATZ SCHOOL OF MEDICINE

S C H O L A R

**"Your investment in scholarship today is
an investment in the future of medicine."**

Larry R. Kaiser, MD, FACS, The Lewis Katz Dean at the School of Medicine

Each year the Lewis Katz School of Medicine at Temple University carefully assembles a class of students who have achieved academic excellence and demonstrated a commitment to serving others.

For many of our students, becoming a Temple Made physician is attainable only thanks to the availability of scholarship funds. Scholarships offer students the ability to meet the expenses of a medical education, free them to choose the path they are most passionate about, and allow them to focus on their studies, not on the cost of their education.

In a time when the world increasingly needs excellent physicians, clinicians and researchers, Temple stands strong as a leader in humanistic education for the next generation of physicians.

Well-positioned for a lifetime of learning, our graduates discover and treat disease with an overarching goal of providing

S H I P

YOUR INVESTMENT AT WORK

outstanding, compassionate care for each patient. We have a unique focus on service to others, a special connection to our community and a commitment to our neighbors that becomes a way of life, not just a part of our curriculum.

The students profiled in the following pages represent the diversity and excellence of our student body. Each has followed a very different path to medical school, and each has been changed by the opportunity afforded them by receiving a scholarship, yet they all have one thing in common—they are grateful for the scholarship support that allowed them to pursue their dreams of becoming a doctor at Temple.

With this report, it is our pleasure to say thank you for every gift made to support our scholarship program, past and future, and for the transformative impact of those gifts on our students. The generous investment of those who support our mission ensures our legacy of excellence in medical education.

Enjoys studying Anatomy.

Chose Temple because he admires its commitment to the North Philadelphia community.

Is energized by learning how the body works to keep us alive.

Thinks the hardest thing about medical school is disciplined time management.

Excited for the unique learning opportunities available to students at Temple University Hospital.

Hometown

Philadelphia, Pennsylvania

Undergraduate Degree

Bachelor of Arts in Psychology
Princeton University, 2014

Intended Area of Practice

Undecided

"As a first generation American and the first in my immediate family to go to medical school, I am excited for the opportunity presented to me to continue bringing pride and joy to my loved ones while pursuing a career that I find truly fulfilling."

Trocon Davis comes from a family with parents who gave him the confidence that he could do anything he set his mind to. He wasn't sure what that was at first. But then, the medicine bug bit.

It was sports medicine that peaked his interest. He was intrigued. But then when he decided he might want to be a physician, he did some work in a research lab. And that really opened his mind.

"It spoke to me," he said.

And so has the Lewis Katz School of Medicine's commitment to its surrounding community. "At Temple, from the first week of classes, they make us aware we are in this community which is in some ways underserved."

"It resonated with my personal values," Davis said.

Trocon is from Philly. He loves its affordability, its culture. "It's a good place to be young," he said. He isn't sure yet what his specialty will be. "I like to have all of my information before I go one way or another." But he will incorporate Temple's trademark holistic, humanistic approach.

"It's important to have an understanding of each individual as a whole person and not just as a patient," he said. "You've got to get to know their full story."

M E SHELBY GARCIA

M E T

MD CANDIDATE 2020

Hometown

Albuquerque, New Mexico

Undergraduate Degree

Bachelor of Science in Biology
Minor in Biochemistry and Spanish, Baylor University, 2016

Intended Area of Practice

Undecided

"On my journey through medicine, I will pursue a specialty where I can best serve the community while becoming the best version of myself I can be. Scholarship support has made this possible and words alone cannot express how grateful I am."

Shelby Garcia wasn't sure about Philadelphia. She's from New Mexico, and when she first got here she called her parents every week and told them she had made a huge mistake.

"Since then I've just been falling in love with the city," she said. At the Lewis Katz School of Medicine, she's found the best friends she's had in her entire life.

"It's definitely an intense setting," she said of medical school. But the group she worked with in anatomy lab last year is helping her through it. It seems they do everything together. All morning in conference. Eating lunch together. Studying together. Happy hours together. Dinner together. Getting ready for board exams. All in it, together. "It's a very welcoming environment," Garcia said.

None of her family is in medicine. But in high school, she was really interested in science. And, she loved volunteering. Medicine seemed a perfect fit.

Medical school is so tiring sometimes all she wants to do is sleep. But it's sharpened her. She knows now that there are only so many hours in a day. So she is determined to use them to be the best version of herself. Not only academically, or even clinically. But with loved ones.

"You can't do it alone," she said. And she isn't. She is going through medical school with the best friends she's ever had.

Favorite block so far is Anatomy.

Chose Temple because she was drawn to the diverse community.

Is energized by the fast-paced and challenging curriculum.

Finds balancing med school and personal life exhilarating.

Enjoys spending free time on the Schuylkill River Trail.

Enjoys studying Neurology.

Favorite rotation to date
is Psychiatry.

Chose Temple for the opportunity
to serve a community that really
needs medical support.

Loves the exposure to the
once-in-a-lifetime experiences
that medical school offers.

Is challenged by maintaining
a sense of self outside of the
rigors of medical school.

Is releasing a full-length album
he wrote and recorded while in
medical school.

M E E T

ZACHARY GUY-FRANK

MD CANDIDATE 2019

Hometown

Philadelphia, Pennsylvania

Undergraduate Degree

Bachelor of Arts in Psychology
Minor in Music
University of Pennsylvania, 2010

Intended Area of Practice

Psychiatry

"From lack of sleep, to high levels of stress and uncertainty, I have been pushed out of my comfort zone time and time again. Through it, I have built a thicker skin to take on the pursuit of medicine's challenges and pitfalls. This opportunity is something that I am incredibly grateful for."

Who knows why the patient struggling with terrible postpartum depression opened up to the medical student sitting across from her that day. Maybe it's that he cared enough to stay late. Maybe it's somehow a result of the Lewis Katz School of Medicine's emphasis on humanistic care.

Guy-Frank wants to be a psychiatrist. He's already a serious musician. "It allows me to better relate to people, and that's something I've been grateful for," he said.

He almost went into music full time, but making it "professional" had robbed him of its joy. Now, he's found it again. And his art helps him bond with patients in difficult times.

"People have a hard time saying, 'I'm having a hard time right now', " Guy-Frank said. "She felt so scared to admit the feelings she was having. But I left that day feeling like I had done something really worthwhile."

Who knows what made that patient open up to him that day. What we know is, he had it. And we need physicians who do.

"I may never see her again. But helping her feel not so overwhelmed, as she did in that moment, I feel like I made a difference."

KAITLIN HEALY

MD/MA URBAN BIOETHICS CANDIDATE 2018

Hometown

Rutledge, Pennsylvania

Undergraduate Degree

Bachelor of Science in Biology,
Minor in Psychology
Carnegie Mellon, 2012

Residency

Family Medicine, Crozer Chester
Medical Center, Chester, PA

"Becoming a doctor has been a dream of mine since I was a child, and I am excited to be the first physician in my family. My scholarship has allowed me to accomplish all that I have and inspires me to give back as well."

Everyone is going through something. Kaitlin Healy gets it. She's glad that the Lewis Katz School of Medicine gets it, too. She loves that. It's what brought her here.

Med students also aren't known for being great at following wellness advice. So she's stepped forward to join OWLs (Our Wellness Liaisons), a student mentoring project that's turned into meaningful research. "School is overwhelming—everyone you know is in medical school. Sometimes it's hard to take a step back and have some perspective," she said.

"It's a luxury for people to take the time to worry about their health," she continued. "That's sometimes lost, especially in primary care. Doctors sometimes take it personally when patients don't follow the plan they have put out for them."

Perspective. That's what she loves about Temple. The perspective. "We get to know whole families of people, and individual patients, really well. We're encouraged to get to know things about them, beyond clinical data," she said.

As a family physician, everything she does will be with the same holistic approach she learned at Temple.

"It's looking at where someone is coming from," she said. "A greater sense of their day-to-day life. How are they coming to you in that moment, and what's influenced the circumstances of their health?"

Enjoys studying Neurology
and Psychiatry.

Favorite rotation to date is
Family Medicine.

Chose Temple because she loved
the people and their commitment
to serving the community.

Finds the best thing about
medical school is learning
skills that allow her to provide
holistic care.

Is challenged by
time management.

Will be the first doctor in
her family.
